

Delegations for Cycle 1

Please see notes on the accompanying blog. The Interchain Foundation will be delegating a total of 10 million ATOMS this cycle. The number of ATOMs allocated to each validator is based on the scores they received against their contributions, as defined in the [Delegations Policy](#). Since this is the first cycle of the new Delegations Program, we considered contributions from both the current and the past few years.

Note that the Delegations Policy states that inactive validators can only receive a delegation if our delegation will push them into the Active Set. As such, there are 4 currently inactive validators who were eligible for our delegations.

The list of validators below and the delegation amounts are based on a snapshot we took on 16 Feb 2023. Given the continuous changes to the amount of bonded tokens and the threshold to enter the Active Set of the Cosmos Hub, we may need to amend the list slightly at the time of deployment.

Published: 23 February 2023

	Validator	Points Received	Delegation Amount (ATOM)
1	Notional	56	754,717
2	Forbole	48	646,900
